PROFESSIONAL SUMMARY

Software developer with over one year of hands-on experience building web applications for HR operations. Experience spans employee management, learning management, task workflows, and AI-assisted recruitment tools. Works with JavaScript, jQuery, PHP, and SQL Server, with additional experience in responsive interface development, database optimization, and client technical support.

TECHNICAL SKILLS

Languages: JavaScript, PHP, SQL

Web technologies: HTML5, CSS3, jQuery, Bootstrap

Frameworks and UI libraries: Laravel, DevExtreme, DevExpress UI

Database: SQL Server, MySQL, PostgreSQL (Supabase), stored procedures, query optimization

Tools and integrations: Git, Postman, AI API integration

Currently learning: React.js

Additional familiarity: Next.js

PROFESSIONAL EXPERIENCE

Vietinsoft

Mar 2025 - May 2026

Software Developer

- Contributed to HR web applications covering employee records, training, task management, and recruitment content generation.
- Developed application features and reusable interface components using JavaScript, jQuery, Bootstrap, and DevExtreme.
- Worked on SQL Server stored procedures for complex HR data operations, with a focus on query execution performance.
- Built a responsive product landing page and integrated AI-powered tools for job descriptions and interview questions.
- Provided remote software installation, configuration, troubleshooting, and client-specific customizations.

EDUCATION
